Assignment 2. Plan, design, deploy

InnoSport website, Team 9

Member	Role	TASKS
Aleksandr Cherkasov	Backend	 Built REST API with Django REST Framework Defined serializers, viewsets & routes Refactored endpoints for REST compliance Added and fixed API tests
Almir Avkhadiev	Backend, QA	 Updated Docker Compose for services Created Postman collections Wrote integration & tests Resolved migrations & deployment issues Verified CORS & auth flows
Anton Bugaev	Frontend	 Initialized React + TypeScript Implemented ActivityList page Fixed client-side filtering Applied responsive Tailwind CSS Optimized bundle with code splitting
Dmitriy Ezovskikh	Frontend	Built Assignment2 documentAdded code splitting & lazy loadingEnsured accessibility & performance
Timur Daminov	Team-Lead, Frontend	Led API & React code reviewsConfigured CI/CD in GitHub ActionsDesigned UI

	Review with the Customer	
7.	AI usage	. 5

1. Functionality of the product

1.1. Use Case Diagram

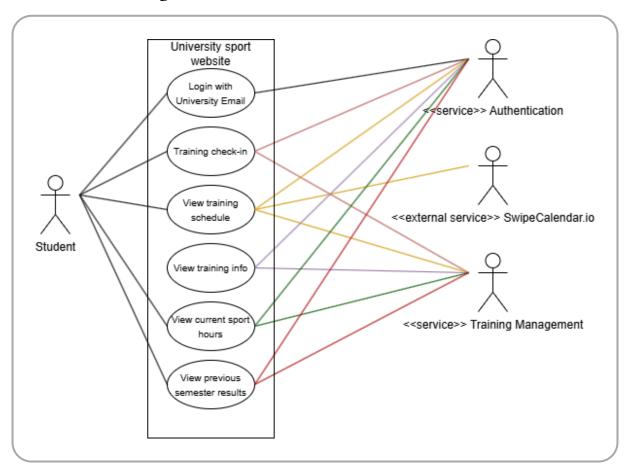

Figure 1: Use case diagram.

1.2. User Stories

FEATURES LIST	USER STORY ID	USER STORY
Authentication	CL-1	As a student I want to be able to login into sport website using my university account, so the login system is consistent for all IU services.
	CL-2	As a user I want to be able to see my current sport hours amount and how much I have to earn by the end of the semester.
F	CL-3	As a user I want to be able to see my previous semesters sport results (amount of hours and fitness test result), so I can measure my training efficiency.
raining details	CL-4	As a user I want to have an ability to see the location, time of the training and the teacher name, so I can plan my time according to this information.
	CL-5	As a user I want to be able to see the amount of students who are already checked in, so I understand if the training will be crowded or not.
Training check in	9-TO	As a user I want to be able to conviniently check-in in the training online, so I don't waste my time doing it offline.
Aesthetic and UI	CL-7	As a student, I want to have the same design as in InNoHassle, so the UI feels consistent with other Innopolis University services.
	CL-8	As a user, I want the sport website to load correctly and quickly both on PC and mobile phone.
	6-TO	As a user, I want to be able to expand or hide list that shows overall sport hours for each semester so the website is more compact and more convenient to use
	CL-10	As a user, I want to have FAQ section which contains information about sport hours, medickal checkup, debts, self-sport reports and fitness tests. Therefore, I can quickly access useful information by myself and without taking trainers time.
Features	CL-11	As a student, I want to be able to submit medical reference online on the sport website, so the process of getting the health group is quick and simple.
	CL-12	As a student, I want to be able to change my medical group if I think it is necessary.
	CL-13	As a student, I want to be able to submit medical reference if I'm ill and can't do sport.
	CL-14	As a student, I want to see my medical group and know what trainings I can attend.
	CL-15	As a student, I want to be able to see the percent of the students who have less sport hours than me, so I can measure if I earn sport hours fast enough.

2. DEEP Product Backlog

2.1. Github Repository

https://github.com/daminow/sportSite

2.2. Backlog

https://github.com/daminow/sport/issues

3. Design of the App

3.1. Figma UI Prototype

 $\underline{https://www.figma.com/design/PyaIBlw0FzgBOWt5v3SIlR/SportSite?node-id=0-1\&t=QlW4\\ \underline{deLPqXzDcA8K-1}$

3.2. Postman API Mock

 $\frac{https://www.postman.com/aleksandr-9130056/aleksandr-s-workspace/collection/p6qz9oq/assignment-2?action=share\&creator=45906581$

4. MVP v0 Deployment

http://t9d.store

5. Activity Tracking Sheet

 $\frac{https://docs.google.com/spreadsheets/d/1ypYbCADkfxVgNzAq-gO7kT-pW7p-oiTCVQeEuyUSIKg/edit?gid=1793499882\#gid=1793499882$

6. Review with the Customer

A review was conducted with the members of one-zero-eight Artem Bulgakov and Ruslan Belkov. At first we talked about user stories, the customers agreed with them. Then, we showed the figma prototype of the UI design. The customers appreciated the design and that it complies with the InNoHassle design. Furthermore, we showed the Postman API mock, which were also approved by the customers. The link to the deployed MVP v0 were shared with the customer. We concluded, that our current MVP versions roadmap is appropriate and no significant changes were required.

7. AI usage

No AI were used in this assignment.
